

NEW CRJ3054 PORTABLE JAW PRIMARY PLANT

Easy to Operate and Maintain. New Levels of Reliability and Convenience.

Ed Sauser, Product Manager at Terex® Minerals Processing Systems states, "The new CRJ3054 portable jaw plant was developed with input from numerous customers. This plant includes many features that simplify maintenance and the flush side design allows easier side loading. We also designed in many options, including a boom mounted rock breaker, so the plant can be configured to meet various customer needs."
